

FEATURE WALKTHROUGH

Print Receipt

End-to-end overview of how delivery receipts are generated — default templates, custom designs, and automated workflows.

01 Default Template

1.2 Via Order Page

02 Custom Template

03 Via Workflow

V1 vs V2

	V1 — FF Off	V2 — FF On
Feature Flag	—	<code>enable_print_order_api</code>
Template type	Angular templates	Handlebar templates only
Custom template	✓ Angular	✓ Handlebar ✗ Angular
Entry points	Dispatch table · Dispatch menu · Order page	Same entry points — routed via template service
Output	Order page → Attachments	Order page → Attachments

Both V1 and V2 entry points will be shown — some merchants are still on V1.

Feature Flags

SCENARIOS 1 & 2

```
enable_print_order_api
```

Activates V2 path. Routes print through the template service. Handlebar templates only.

SCENARIO 3 — WORKFLOW

```
enable_print_order_api
```

```
create_note_rpc_upload_id
```

```
generate_delivery_receipt_action
```

All three required to enable the workflow action and the upload mechanism.

TEMPLATE SETUP

Merchant Config
→ Templates
→ Print Order Template

Must be a Handlebar template. Angular templates do not work in V2.

1

SCENARIO 1

Default Template

REQUIRED FEATURE FLAGS

```
enable_print_order_api
```

STEPS

- 1 Open an order in the Dispatch page
- 2 Trigger print from the entry point (see right panel)
- 3 Open the Order page
- 4 Attachments — verify receipt with the default layout

Entry Points

V2 — ORDER MANAGER

- Click order → More options → Print Receipt
- Route Monitor: click route → More options → Print Receipt

V1 — DISPATCH LIST

- More actions → Print Receipt
- Click the Print Receipt label in the list row

Output: Order page → Attachments

1.2

SCENARIO 1.2

Via Order Page

REQUIRED FEATURE FLAGS

```
enable_print_order_api
```

STEPS

- 1 Select an order in the dispatch page
- 2 Open the Order page
- 3 Actions → Print Receipt
- 4 Attachments — verify the receipt is generated

Entry Point (V1 & V2)

BOTH V1 & V2

- Select order in dispatch
- Open Order page
- Actions → Print Receipt

Output: Order page → Attachments

2

SCENARIO 2

Custom Template

REQUIRED FEATURE FLAGS

```
enable_print_order_api
```

STEPS

- 1 Configure: Merchant Config → Templates → Print Order Template
- 2 Use any entry point from Scenario 1 or 1.2
- 3 Trigger Print Receipt
- 4 Attachments — verify the custom template layout is applied

Template Rules

WORKS

- ✓ Handlebar templates

DOES NOT WORK

- ✗ Angular templates (V2 only accepts Handlebar)

Output: Order page → Attachments

3

SCENARIO 3

Via Workflow

REQUIRED FEATURE FLAGS

`enable_print_order_api``create_note_rpc_upload_id``generate_delivery_receipt_action`

STEPS

- 1 Show the workflow: Trigger = ready to execute changed to yes
- 2 Action = Generate delivery receipt
- 3 Update an order — set ready to execute = yes to fire it
- 4 Order page → Attachments — receipt appears automatically

Workflow

TRIGGER

- Order life cycle › ready to execute changed to yes

ACTION

- Generate delivery receipt

Automated — no dispatcher action required

All Scenarios at a Glance

Scenario	Feature Flags	Template	Trigger	Output
1 — Default	<code>enable_print_order_api</code>	Built-in fallback	Dispatch: Order Manager / Route Monitor (V2) or list row (V1)	Attachments
1.2 — Order Page	<code>enable_print_order_api</code>	Built-in fallback	Order page → Actions → Print Receipt	Attachments
2 — Custom	<code>enable_print_order_api</code>	Handlebar (merchant config)	Manual — same entry points	Attachments
3 — Workflow	Receipt always appears in Order page → Attachments + 2 more FFs	Either	Automatic — workflow fires on trigger	Attachments
